

Education and profession: a “Wicked” relationship

ARCHITECTS' COUNCIL OF EUROPE
CONSEIL DES ARCHITECTES D'EUROPE

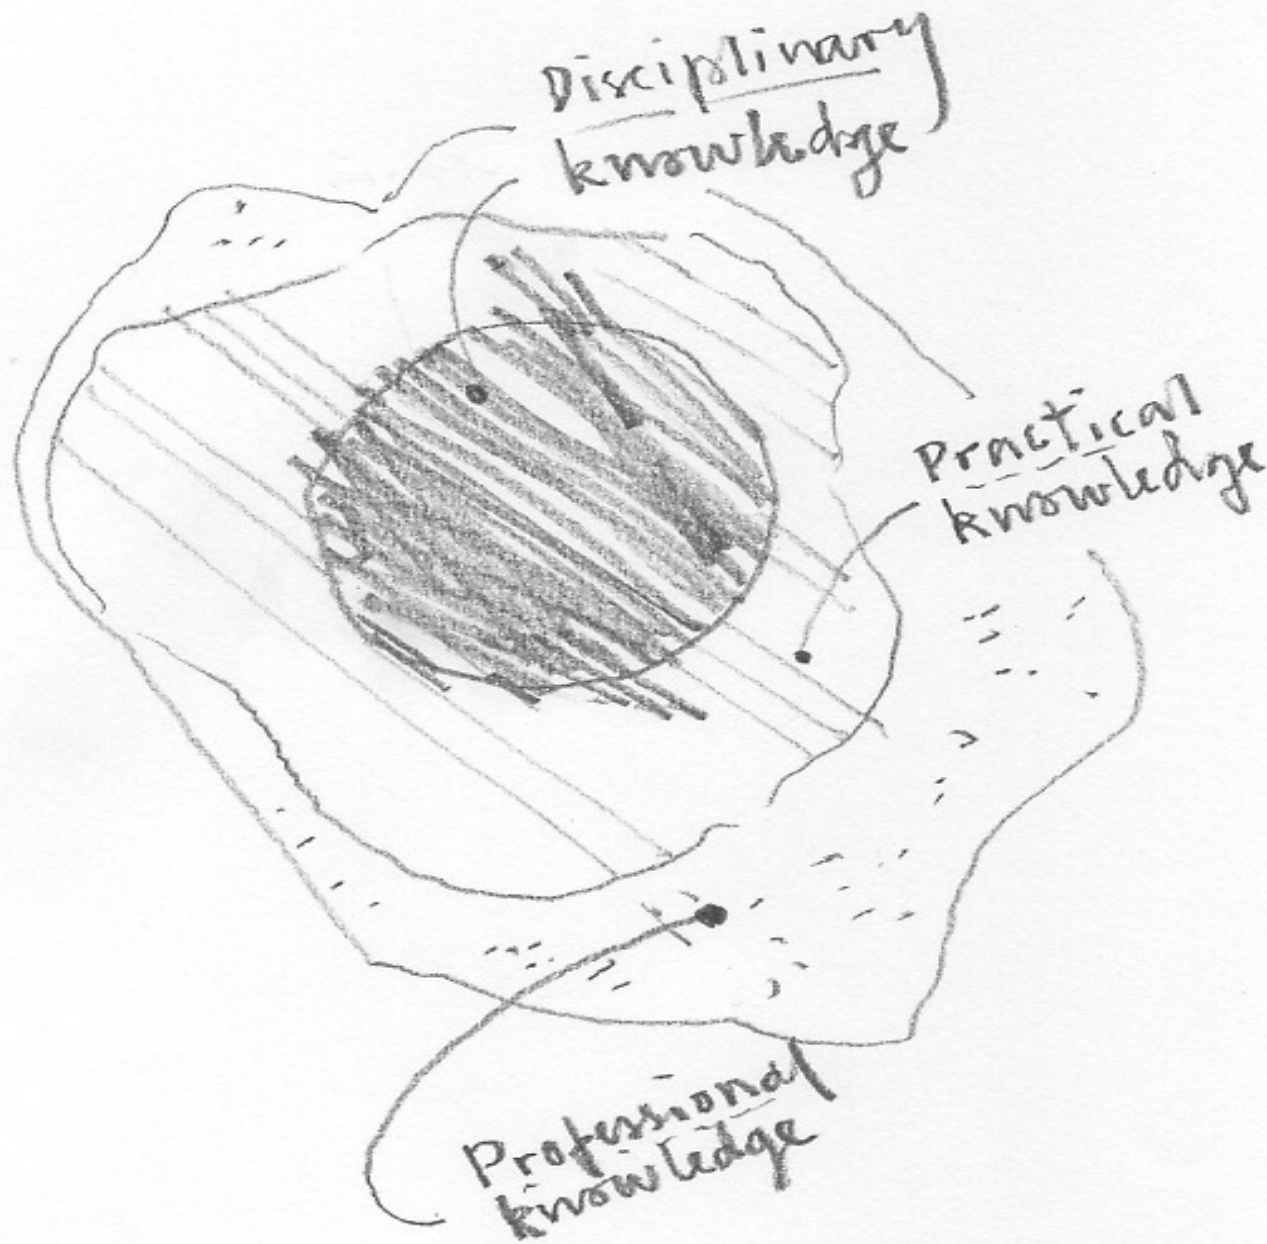

Tarald Lundevall

Professional
Knowledge

1
Employers accept to transfer detailed
Professional Knowledge to newcomers.
The most important item for employability is the
attitude, not the amount of knowledge.

2

Education on Professional knowledge must include a deeper understanding of *relationships*: in teamwork, social participation, communication and relation to users and client.

3
Students should know typical plan- and design processes, and how to use them.

4
Some Professional experience during the studies is highly recommended.
