

ARCHITECTURE – TOWARDS A STEP CHANGE IN BUILDING PERFORMANCE

Thursday 22 June – 9h00 to 10h30

Résidence Palace, Salle Polak – 155 rue de la Loi, Brussels

In the context of the on-going revision of the Energy Performance of Buildings Directive (EPBD), this Panel Discussion aims to debate and shed light on:

- the architectural determinants of building performance and the role of architecture in creating a step-change in the uptake of energy efficiency measures;
- the four pillars of building performance: resource efficiency; indoor environmental quality; occupant satisfaction; value;
- the imperative to consider building performance in a broader and more holistic perspective, so as to account for the non-energy benefits of better performing buildings;
- the feasibility of requiring systematic feedback on the achieved performance of buildings in operation / the validation of buildings performance in use;

AGENDA

- 1. WELCOME** – Luciano LAZZARI, ACE President
