

**SHARING COMMON VALUES:
INTERNATIONALISATION OF THE ARCHITECTURAL PROFESSION
AND THE NEW EUROPEAN BAUHAUS**

18th April 2024

Elizabeth de Portzamparc - Architect

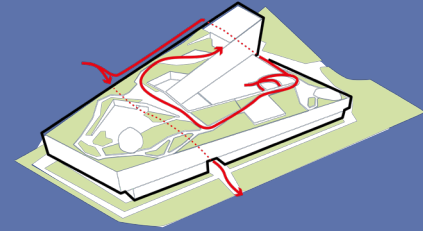

A NEW ARCHITECTURE

- Three experimental workshop since 1970's, including the **sustainable workshop, created in 2008**. Transdisciplinary, they have oriented the development of projects.
- The criticism or the Modern Movement while retaining its relevant contributions, leads to the **development of 10 principles, which are called the New Architecture**.
- Principles conceived as orientations to obtain more virtuous and sustainable projects. These **can be applied in all cultures as themes and not predefined standards or aesthetics**.

SCIENCE HALL – ZHANGJIANG SCIENCE CITY (2017-2022)

- Vertical village for the regeneration of neighborhood life, through this public facility open to the city
- A rooftop park of almost 2ha and a public square on the ground of 1ha

SCIENCE HALL – ZHANGJIANG SCIENCE CITY (2017-2022)

- “Modern classic” construction methods, metal and concrete beams and metal square beams suspended for the cantilever
- Sustainable ceramic, photovoltaic electricity production, storage robot for unforeseen events

FENGXIANG ARCHEOLOGICAL MUSEUM (2020 – 2025)

- Enthusiasm of the project contractor and companies with innovative ideas ;
- Fewer regulations ;
- Local materials and circular economy development ;
- Craft development and regeneration of surrounding villages ;
- AFD French experts for the protection and regeneration of biodiversity ;
- Transdisciplinary teamwork.

LIVING IN THE LEAVES (2021 – 2026)

- Development of a leisure area in a site including a thousand-year-old forest to be protected: hotel-spa, houses, and museum
